

High Concentrated Bicarbonate ion water

高濃度炭酸水素イオン泉

Patented

BICARBONATED

Walking the world with
carbonic acid medical treatment

Innovation

Instant generation of
Bicarbonated spring by
patented technology

Japan Made

High Reliability
100% made in Japan

Compact Des

Small & Light
W318mm/H216mm/D130mm

No Power Supply

No Electricity required
Safe and Secure Quiet
without motor

Maintenance Free

Made by Stainless Steel, Rust free,
Excellent Durability

BCF-20001DN

Bicarbonated Spring is safe and reliable

Innovated patented technology brings you safe and sucure with high concentration carbonated spring

Carbonated spring keeps blood vessels young and supports health and beautiful skin

Carbonic acid permeates from the skin and the surface of the stomach wall to promote the secretion of the vasodilator hormone "prostaglandin E2". Blood vessels are expanded, blood flow is improved, and oxygen and nutrients can easily flow.

Achieved a maximum concentration of 1,300 ppm !

BCF-2000IDN clearly differentiate from other companies' products. The original patented technology made the fluid particles finer and increased the solubility. (Measurement by National Laboratory)

Already Used in medical hospitals around the world

Ooverseas medical hospitals have attention on BCF-2000IDN, and are introduced in Asia, the Middle East, Europe and the United States.

<Main indications of carbonated spring>Chronic muscle or joint pain or stiffness (rheumatoid arthritis, osteoarthritis, low back pain, neuralgia, 50 shoulders, bruise, sprain, etc.), muscle stiffness in motor paralysis, coldness, peripheral circulatory disorder, gastrointestinal function Decrease (stomach, gas accumulation, etc.), mild hypertension, impaired glucose tolerance (diabetes), mild hypercholesterolemia, mild asthma or emphysema, hemorrhoid pain, autonomic instability, various symptoms due to stress (Sleep disorders, depression, etc.), post-illness convalescence, fatigue recovery, health promotion (from the Ministry of the Environment Natural Environment Bureau therapeutic spring "general indication" "spring quality indication")
